Summary

I'm a technical game designer who loves systems that surprise players but still feel fair. I enjoy studying combat mechanics and character design. I've been trying to bring my ideas to fruition ever since I started tinkering with abilities in Unreal Engine and modding Minecraft. As a long-time Teamfight Tactics player, I'm fascinated by how traits, items, and augments interact to create endlessly fresh strategies. I want to bring that same sense of emergent design and iteration to Riot's TFT team.

Education

University of Manitoba **2021-2025**
Computer Science Bachelor of Science
Relevant Coursework: Game Systems Design, AI for Games, Data Structures, Graphics Programming

Projects

Autobot Battler
Built an auto-battler sandbox from scratch to explore combat automation, unit synergy systems, and data-driven balancing.
Unreal Engine 5, Blueprints, DataTables

ConnecTFTions
Developed a browser-based puzzle inspired by NYT Connections, themed around Teamfight Tactics. Players group units by shared traits, origins, and costs before running out of mistakes.

JavaScript, HTML/CSS, UI/UX Design

TypeJump
Designed and programmed a fast-paced typing and platforming game to learn more about game development and C#
C#, Unity

Skills

Engines
Unreal Engine 5 (Blueprints, DataTables), Unity, Minecraft Forge/Fabric

Languages
C/C++, C#, Java, JavaScript, Python, HTML/CSS

Tools and Technologies
Git, React, Node.js, MongoDB

Experience

McDonald's **Dec 2017 - Jun 2022**
Swing Manager

Costco Wholesale **Jul 2022 -**
Deli Clerk

Ranked TFT Player **Set 15**
Peak: Master 335 LP

Awards/Certifications

- LEVEL 1 FIRST AID WITH CPR B & AED
- AI-KON XENOVERSE 2 CHAMPION
